

## **2000-2001 KINDERGARTEN IMMUNIZATION ASSESSMENT RESULTS**

This fall's immunization assessment of kindergarten students showed a slight increase in the percentage of students with all required immunizations. However, it also showed a slight decrease in the percentage of students immunized for most of the single antigens. With 99.1% (9,179) of California schools reporting, the percent of students adequately immunized for the 4:3:2:3 series increased 0.3% from 91.9% last year to 92.2% in 2000. The only improvement for a single antigen was the coverage level for the hepatitis B immunization, which increased 0.1% to 96.4%. This year, 0.77% of students had Personal Beliefs Exemptions (PBE), an increase of 0.11% from last year.

The number of schools reporting kindergarten data decreased slightly this year by 66 schools. The total enrollment for these schools was 526,466 kindergartners, a decrease of 1,147 students over last year.

Effective July 1, 2001, one-dose of varicella or health care provider documented varicella disease or immunity will be required for kindergarten entry. Even though it was not required this year we asked for voluntary information on varicella coverage. 67.3% (5,704) of the schools reported information for varicella this year. The coverage level among those schools for varicella immunization or healthcare provider documentation of varicella disease or immunity is 73.8% (388,380 students).

Statewide breakdowns by county and type of school are enclosed in Coordinator Updates. Data for local districts and schools will be sent to county coordinators and are also available upon request.
